

# FIRSTO® Accessories

### Weathershield

This is a device that fits on the top of a Firsto unit and extends out over the cable tray protecting the opening from driving rain and snow. These stainless steel covers are available for all sizes of Firsto systems.

### Sealant

FIWA sealant ( fire and water) is a special fire rated material that is field applied to the surface of the Firsto units to provide an added barrier for moisture, gases, and dust. The sealant adheres well to the pads, cables and the steel casing and remains flexible in all types of weather conditions.

Actifoam, FIRSTO, FIWA, DRIFIL AND CSD are registered trademarks of Beele Engineering BV.™
